Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/86/4686-0001 $05.00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £29 net (US $66 in the USA and Canada) plus postage. The subscription price (which includes postage) to volumes 162–173, 1986, is £334 (US $760 in the USA and Canada) for institutions; £167 (US $380) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 32 East 57th Street, New York, NY 10022.

Volume 171 October 1986

CONTENTS

Time-dependent two-dimensional detonation: the interaction of edge rarefactions with finite-length reaction zones. JOHN B. BDZIL and D. SCOTT STEWART *page* 1

Conserved scalar probability density functions in a turbulent jet diffusion flame. M. C. DRAKE, R. W. PITZ and W. SHYY 27

Boundary conditions for plane flows of smooth, nearly elastic, circular disks. J. T. JENKINS and M. W. RICHMAN 53

A linear stability theory of double-diffusive horizontal intrusions in a temperature–salinity front. HIROSHI NIINO 71

Elliptical vortices in shallow water. W. R. YOUNG 101

Thin-flame theory for the combustion of a moving liquid drop: effects due to variable density. GEORGE GOGOS, S. S. SADHAL, P. S. AYYASWAMY and T. SUNDARARAJAN 121

Self-accelerating turbidity currents. GARY PARKER, YUSUKE FUKUSHIMA and HENRY M. PANTIN 145

Film-splitting flows in forward roll coating. D. J. COYLE, C. W. MACOSKO and L. E. SCRIVEN 183

The force on an axisymmetric body in linearized, time-dependent motion: a new memory term. C. J. LAWRENCE and S. WEINBAUM 209

Boundary-layer receptivity to unsteady pressure gradients: experiments and overview. M. NISHIOKA and M. V. MORKOVIN 219

Bifurcations of two-dimensional channel flows. IAN J. SOBEY and PHILIP G. DRAZIN 263

Shear-wave speeds and elastic moduli for different liquids. Part 1. Theory. D. D. JOSEPH, A. NARAIN and O. RICCIUS 289

Shear-wave speeds and elastic moduli for different liquids. Part 2. Experiments. D. D. JOSEPH, O. RICCIUS and M. ARNEY 309

The response of an incompressible, viscoelastic coating to pressure fluctuations in a turbulent boundary layer. JAMES H. DUNCAN 339

The special relativistic shock tube. KEVIN W. THOMPSON 365

Inviscid evolution of stretched vortex arrays. D. I. PULLIN and P. A. JACOBS 377

An experimental study of the upwelling response of stratified reservoirs to surface shear stress. STEPHEN MONISMITH 407

Taylor–Görtler instabilities of Tollmien–Schlichting waves and other flows governed by the interactive boundary-layer equations. PHILIP HALL and JAMES BENNETT 441

Rip-current generation near structures. H. G. WIND and C. B. VREUGDENHIL 459

Wavenumber selection in ramped Rayleigh–Bénard convection. JEFFREY C. BUELL and IVAN CATTON 477

Motion of a single capsule in a hydraulic pipeline. Y. TOMITA, M. YAMAMOTO and K. FUNATSU 495

Note on the Onsager symmetry of the kinetic coefficients for sedimentation and diffusion in a dilute bidispersion. G. K. BATCHELOR 509

Numerical shock propagation using geometrical shock dynamics. W. D. HENSHAW, N. F. SMYTH and D. W. SCHWENDEMAN 519

Measurement of wall shear stress in turbulent boundary layers subject to strong pressure gradients. F. HIRT and H. THOMANN 547
